

One image. Thirteen playable animations.

A source-preserving storyboard of the same supplied Prysai image moving through Motiflux V1 design themes. The source stays recognizable while the reveal, motion language, and algorithm explanation change.

The Prysai logo, featuring a stylized 'P' icon followed by the word 'Prysai' in a sans-serif font.

ROUTING EXAMPLE

AI-field

Request: I want to make a logo animation for my artificial-intelligence company.

Route: signal flow / convergence / progressive disclosure.

Animation: the supplied image moves through a field of signals into a readable canonical logo. The HTML is playable; this PDF records its source, reveal, transform, and settle frames.

13 routable themes / 1 identity source / 0 geometry edits

SUPPLIED RASTER SOURCE / IDENTITY LOCKED

05

Fintech-trust

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

fintech, banking, bank, payments, payment, trust

Communicate reliability, controlled movement, and successful resolution.

ALGORITHM
monotonic progress / guarded state transitions / bounded confirmation spring / high-contrast completion cue / failure-safe cancellation

QA state correctness; cancellation; contrast; announcement timing; no false success

06

Security-shield

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

security, privacy, identity, authentication, auth, defense

Convey boundary, verification, and controlled access.

ALGORITHM
boundary-first reveal / occlusion-and-aperture logic / finite-state verification sequence / restrained lock transition / interruptible animation

QA semantic state; interruption; focus; contrast; temporal clarity

07

Commerce-energy

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

commerce, retail, shopping, marketplace, consumer, sale

Create approachability and action without making the brand feel unstable.

ALGORITHM
short interaction transitions / spring-like confirmation / badge-and-accent choreography / responsive hit-area anchoring / action-completion state machine

QA input latency; hit-area stability; repeat action; focus; touch behavior

08

Automotive-precision

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

automotive, mobility, transport, engineering, performance, industria

Express mass, direction, precision, and mechanical confidence.

ALGORITHM
kinematic trajectory planning / acceleration and jerk limits / anchor-based transforms / directional light sweep / constrained settle

QA jerk continuity; clipping; anchor correctness; responsive bounds

09Sports-impact

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

sports, fitness, competition, speed, impact, bold

Create energy through anticipation, compression, release, and recovery.

ALGORITHM

anticipation compression / velocity burst / directional smear or stretch / controlled overshoot / recovery-to-idle state

QA peak silhouette; deformation limit; flashing risk; reduced motion

10Cinematic-title

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

cinematic, film, movie, title, trailer, story

Reveal meaning through attention control, scale, silence, and composition.

ALGORITHM

camera-space composition / depth-layer parallax / masked reveal / light-to-dark exposure curve / beat-driven timing

QA final readability; crop safety; contrast; reduced motion; static fallback

11Nature-flow

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

nature, organic, wellness, sustainable, water, wind

Imply growth, breath, flow, and connection without losing mark structure.

ALGORITHM

curvature-following flow / bounded low-frequency drift / phase-offset secondary actors / damped wave / organic settle

QA smoothness; amplitude bounds; topology; loop seam; reduced motion

12Gaming-world

PLAYABLE IN HTML

SOURCE

REVEAL

TRANSFORM

CANONICAL

gaming, esports, fantasy, sci-fi, character, quest

Create personality, reward, and world-building around a recognizable mark.

ALGORITHM

stateful combo or quest beats / seeded particle secondary layers / bounded squash and stretch / camera emphasis / interaction-triggered replay

QA readability; deterministic replay; flashing limits; performance; reduced motion

13 Accessibility-first

PLAYABLE IN HTML

accessible, accessibility, reduced motion, calm, inclusive, low moti

Preserve orientation and feedback while minimizing vestibular, cognitive, and visual load.

ALGORITHM

opacity and color state changes / short translation only when necessary / user-controlled pause and tempo / focus-preserving transitions / static canonical

QA accessibility tree; focus; contrast; reduced motion; static equivalence
