

One image. Thirteen playable animations.

A source-preserving storyboard of the same supplied Prysai image growing through Motiflux V1 design themes. The source stays recognizable while construction order, motion language, and algorithm explanation change.

SUPPLIED RASTER SOURCE / IDENTITY LOCKED

ROUTING EXAMPLE

AI-field

Request: I want to make a logo animation for my artificial-intelligence company.

Route: signal convergence / component growth / progressive disclosure.

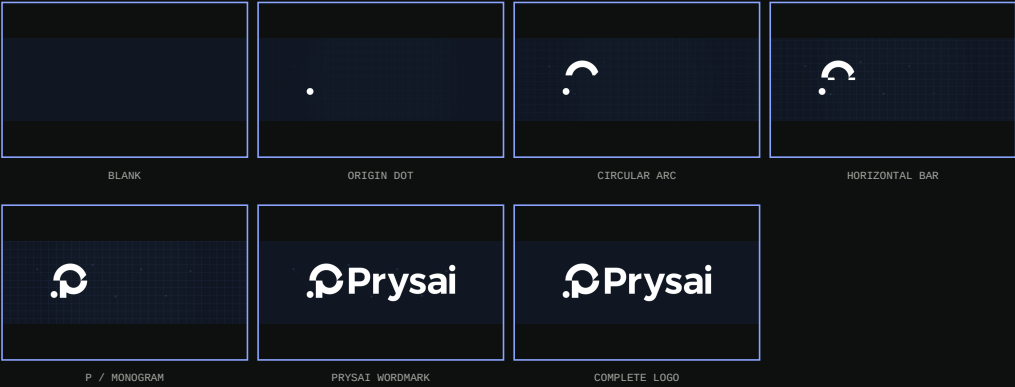

Animation: blank field -> origin dot -> circular arc -> horizontal bar

-> P / monogram -> Prysai wordmark -> complete Logo. The HTML and GIF are playable; this PDF records growth frames for the same supplied image.

13 routable themes / 1 identity source / 0 geometry edits

accessible, accessibility, reduced motion, calm, inclusive, low motion
Preserve orientation and feedback while minimizing vestibular, cognitive, and visual load.
ALGORITHM
opacity and color state changes / short translation only when necessary / user-controlled pause and tempo / focus-preserving transitions / static canonical
QA accessibility tree; focus; contrast; reduced motion; static equivalence
